INVESTMENT BANKING

Possibly interested in a Financial Career?
Know all the different types?

Wednesday 5th October 11.30 SFCR
Outside Speaker
explains about Investment Banking
Let Miss Campbell know if interested.

An **investment bank** is a financial institution that assists individuals, corporations, and governments in raising financial capital by underwriting or acting as the client's agent in the issuance of securities. An investment bank may also assist companies involved in mergers and acquisitions (M&A) and provide ancillary services such as market making, trading of derivatives and equity securities, and FICC services (fixed income instruments, currencies, and commodities).

The two main lines of business in investment banking are called the sell side and the buy side. The "sell side" involves trading securities for cash or for other securities (e.g. facilitating transactions, market-making), or the promotion of securities (e.g. underwriting, research, etc.). The "buy side" involves the provision of advice to institutions that buy investment services. Private equity funds, mutual funds, life insurance companies, unit trusts, and hedge funds are the most common types of buy-side entities.

The average **starting salary is around £35,000 to £40,000**. After three or more years, salaries may range upwards or around £50,000. Those with significant experience may earn a base salary of around £150,000. Pay is often performance related and bonuses can sometimes be four times the base salary, or more.
